

FUTURE FORWARD

AI in Real Estate

Presented by

HOW MANY OF YOU WORRY ABOUT AI?

**TINGEN
CREATIVE**

AI won't replace your job. Someone who knows how to use it will.

**HOW MANY OF YOU
HAVE USED AI?**

ARE YOU SURE?

A top-down view of a wooden desk. On the left, a portion of a black laptop is visible. In the upper center, a white ceramic cup filled with dark coffee sits. To the right of the cup is a black computer mouse with a silver cord. Further right is a smartphone displaying a lock screen with a mountain peak wallpaper, the time 9:35, and the date Friday, September 15. A pair of glasses with a thin frame lies on the desk to the right of the phone. The background is a warm-toned wooden surface.

VIRTUAL ASSISTANT

We've used AI, quietly, during the last several years in a variety of ways.

From virtual assistant devices, “Hey Siri, what’s the circumference of the Earth?” or “Alexa play my favorite song.”

RECOMMENDATIONS

To recommendations, which have been said to pick better than we can ourselves.

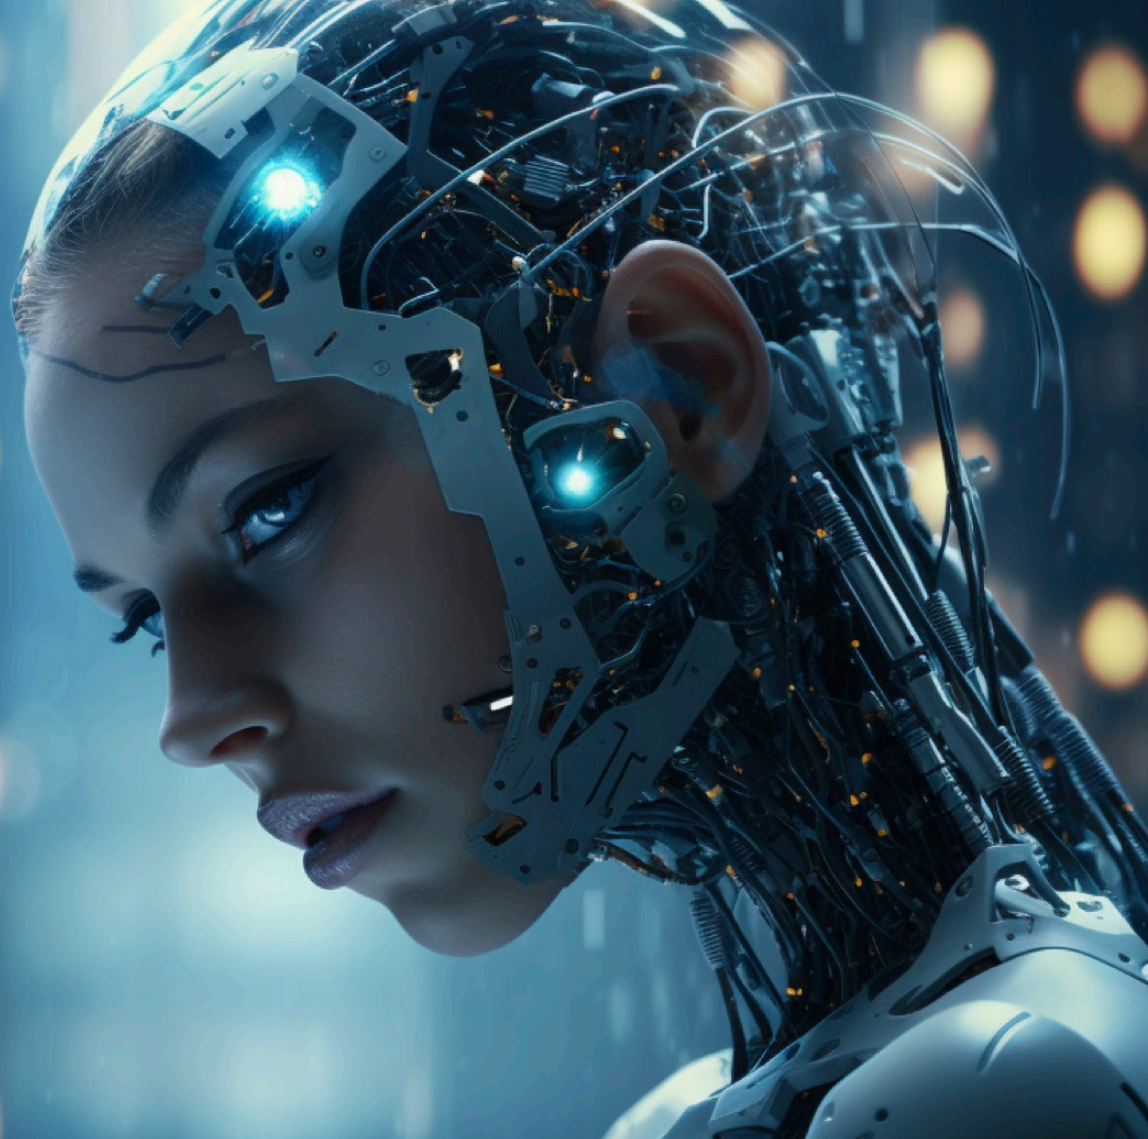

SELF-DRIVING

And self-driving vehicles. What awaits us around the corner?

WHAT IS AI?

AI, in a broad sense, uses machine learning and deep learning algorithms to perform tasks that require the ability to learn from experience, understand complex concepts, recognize patterns, interpret the nuances of natural language and independently make decisions.

Generative AI is a subset of artificial intelligence that focuses on what its name implies – generating new content, designs or solutions. It employs advanced algorithms to create outputs, including synthetic data, images, text, music and video.

TOP 3 REAL ESTATE TECHNOLOGIES

Source: JLL Research

According to JLL Research, AI and Generative AI are among the top 3 technologies expected to have the biggest impact on real estate in the next 3 to 5 years.

\$42.6B ENTERPRISE CASES IN 2023

Source: JLL Research

Additionally, enterprise use cases for generative AI represent a substantial opportunity, with projections reaching US\$42.6 billion by end of 2023.

\$98.1B ENTERPRISE CASES IN 2026

Source: JLL Research

Anticipating a 32% compound annual growth rate (CAGR), the market is expected to grow to \$98.1 billion by 2026.

INFRASTRUCTURE DRIVING DEMAND

Nearly 40%, of all AI companies globally are located in U.S. This technology requires vast infrastructure requirements:

- Computing hardware, high-speed connectivity networks, power supply, cloud infrastructure and data storage
- Continuous expansion will drive need for more power, cooling facilities and data centers, not to mention manufacture of these materials.

AI infrastructure location criteria gives more weight to lower energy prices and lower land costs. Factors such as competitive energy pricing and energy consumption regulations are driving growth toward less crowded markets such as Atlanta in the U.S., Malaysia and Thailand.

500+ COMPANIES

PROVIDE AI-POWERED SERVICES TO THE REAL ESTATE MARKET

Hundreds more are expected to be created in the near future.

AI won't replace your job, someone who knows how to use it will.

A man with tattoos and a wireframe robot in a futuristic setting. The man is on the left, shirtless, with blue and red lighting. The robot is on the right, made of red wireframe. The background is a dark, industrial space with a car visible in the distance.

PROS VS. CONS

PROs

- Idea Generation
- Inspiration
- Speed
- Efficiency
- Scale
- Cost-effective
- Anyone can use it

CONs

- Plagiarism
- Incorrect information
- Theft of IP
- Quality
- Creativity
- Personalization
- Editing

USE CASES

- Assistive technology
- Quick comps and mock ups
- Storyboarding
- Social Graphics
- Comic and Children's books
- Legal Documents

- Research
- Search
- Data analytics and benchmarking
- Automated facility management
- Price modeling for investment management

- Asset valuation and risk management
- Construction site monitoring
- Scheduling for capital projects
- Matchmaking for investment and transactions

Embrace the future of real estate today.
Supercharge your branding and marketing
with the unmatched power of AI. Don't just
stay ahead of the curve — define it.
