

MULTIFAMILY AMENITIES SURVEY

FULL LIST OF RESPONSES AS OF 5/1/24

COMMUNITY AMENITIES

Indoor Space Areas

Building a sense of community is beneficial any multi-family investment. The following ideas can help create that community, decreasing vacancy and increasing retention.

- Socialization Areas (Media online and print library reading room, Game Rooms both old school (i.e. Billiards, shuffleboard tables, ping-pong, darts, etc.) and today's world (gaming stations, arcade, simulator, VR and AR)
- Laundry room
- Gathering spot for social entertainment and events
- Gourmet kitchens that sometimes offer cooking classes taught by a chef
- Theater room TV/Film Screening Room
- Community Wine cellars
- Coffee/Juice bars with complimentary drinks for residents
- Cyber cafe with free Wi-Fi
- Sundry Shop (self serve with essential items such as toiletries, snacks, and drinks)
- Gyms / Fitness (provide approved outside personal trainers, Stretch class, yoga classes etc., Peloton and other trending fitness apparatus)

Outdoor Space Areas

With the new trend of remote working, many residents are spending more time at home. So, they seek outdoor spaces in their own residential space to relax. These amenities answer the remote question.

- Outdoor kitchens with grill tables
- Swimming pool & deck "Resort Look"
- Rooftop decks with lounge chairs
- Outdoor Bar
- Gardens areas for residents Community gardening
- Playgrounds for kids
- Outdoor Fitness park
- Outdoor Fire pit area
- Game area for bocce ball, ping-pong, Corn hole, putting green
- Pickle ball. A lot of owners have converted a tennis court into two pickle ball courts.
- For specific properties that have lots of land (and especially a pond/lake), a paved or gravel trail with fitness stations can get dual use by humans with and without pets
- Outdoor movie screens
- Designated smoking areas

Pet Amenities

Some common pet amenities are:

- Dog park
- Pet washing stations
- Pet attendant services
- Pet water Fountain
- Pet Grooming services

IN-UNIT AMENITIES

In-unit amenities are meant for a specific apartment and are accessible to the people residing in that unit. These amenities are the add-ons in an apartment for a more comfortable living space. With more in-unit amenities, you can charge more for the property.

Here is the list of some in-unit amenities:

- In-unit laundry
- Centralized air conditioners
- Dishwashers
- Fireplaces
- Smart thermostats
- Designer kitchen with upgraded cabinets, countertops, appliances, light/plumbing fixtures, faux-wood flooring and backsplash.
- Designer bathrooms with upgraded cabinets and countertops, lighting/plumbing fixtures, faux-wood flooring and stand-up shower.
- Valet Trash Services

SERVICE AMENITIES

Adding various services to the property or highlighting those close by offer a level of convenience and ease to the residents' lives.

- Dry Cleaning / Shoe Repair / Tech help (cell phone, I-Pad, Laptop repair)
- Create a drop-off / pickup location
- Package Delivery System
- Today, almost everyone prefers online shopping. All the residents want 24/7 access to their online packages.
- For the convenience of residents as well as staff, you can invest in a tech-powered package delivery system. It will reduce the hassle of package deliveries, organizing parcels, and delivering them to residents.
- You can offer a package locker or package room to make online deliveries easy. Here are some features of a package room:
 - It ensures that the couriers can complete deliveries with easy access to the property.
 - It prevents package theft and missing deliveries.
 - It authorizes residents to pick up their packages at any convenient time.
 - It sends an automatic notification when a package is received.

PARKING AND TRANSPORTATION

Facilitating ease of travel to and from home is another potential advantage which can be added to the multi-family setting.

- Reserved resident parking
- Visitor parking
- Designated rideshare pick-up areas
- Designated special parking spaces – handicap, expecting mothers, visitors, EV stations
- Storage – if there is excess parking spaces offer storage containers that fit into a parking space for residents' storage and baby stroller storage
- Personal touch for residents and visitors in the parking deck
- Umbrellas at ingress / egress point of the deck
- Defibrillators in key locations
- Heaters in ceiling at ingress / egress point of the deck
- Cool mist machine at ingress / egress point of the deck
- Wi-Fi throughout the deck
- Create a designated smoking area
- Goodwill Drop Box

Vehicle Services

Occasionally, residents' may have an issue with their personal vehicle. Light their burden providing service to speed them through those stressful times.

- Car wash, tire inflation, car vacuum, window cleaning supplies, dry car detailer(once a week), on call dent and scratch repair service company
- Parking ambassador (parking operations member) would have on the maintenance cart
- Battery jumper cables with portable charge system, keys locked in car unlocking tool, windshield wiper fluid, radiator fluid, fire suppression canister for EV batteries
- Micro mobility center (this area will be for bikes (personal and rental), motorcycles, Scooters rental, skateboard locker, Zip Cars (daily rentals))

Wayfinding Package

Wayfinding packages are engineered with the customer experience at the helm of the thought process. Improved wayfinding provides numerous improvements from parkers locating the facility to improving their ingress and egress during their visit.

- Guides pedestrian traffic in and around the property.
- Establishes safe areas for pedestrians to navigate to their vehicle.
- Color coordinated signage to signal parking locations.
- Drives foot-traffic to all the decks walkable, ingress and egress points which will, boost awareness

Security

Residents shouldn't just feel secure in their unit but in the complex as a whole. Making parking areas and decks safe maintain the tranquility and peace an multi-family apartment complex should maintain.

- Paint the full interior of the deck make it brighter.
- Lighting LED lighter "brighter is better"
- Emergency call boxes throughout the deck
- Safety area for weather related events and for safety issues "shelter in place" if they're in the deck.
- For a comprehensive security plan work with a security consultant to cover all your bases

ENVIRONMENTAL CONSIDERATIONS

Many residents today are environmental conscious. Providing "green" incentives will delight many seeking smarter more environmentally friendly living options.

- EV Charging Stations
- Suggested to run conduit throughout the deck to allow for easy new residents' hook ups
- Add solar panels on the top level of the parking deck, that act as covered parking and provide clean power to run the deck's operations
- Add green spaces throughout the parking deck via small landscaping pods
- Offer residents access to purchase carbon offsets for their vehicles
- Offer to the residents incentives for carpooling, car-sharing or bike-sharing programs
- Identify drone-taxi landing pad on top level of the deck (no one has implemented this yet, but they're looking for locations)

COWORKING SPACE

Many residents' still work from home. Offering options to break from the distractions of the home can be a boon and escape from the home environment.

- Add more desks for single persons and their independent work, but prefer including some larger tables also.
- Include some armchairs and sofas.
- Offer free Wi-Fi
- Offer office essentials, printer, paper, pens, etc.
- Arrange a desk reservation system for proper seating arrangement.
- Large flat screen display TVs that would show current weather and traffic conditions, area amenities map, Ride Share information and public transportation information/schedule
- Fast charging cell phone and laptop system
- Laptop set up for employees parking needs and questions
- Laptop, plug in stations
- Top of the line "FAST" Wi-Fi
- Grab and Go "Coffee and more"
- Decompress, quiet room
- Bathroom and a connecting nursing room "the pump"
- The Team Room create a separate large room within the space that the employees can use for various company programs such as
- Periodical, information classes, such as "best way to buy or sell your car", "The repair expert how to fix your car yourself"

TECHNOLOGY AMENITIES

The survey revealed a lot of new technology amenities being included:

Smart Access Control

- Adding smart access control to the property is an effective way to offer luxury to the residents.
- Regardless of the demographics, lifestyles, or community types, all residents want a simple way for themselves and their visitors to enter the property. By installing a smart access control system, you can ensure both convenience and security at your property.
- You can consider a smart access control system with the following features:
 - Smartphone-based video intercom: By installing a smart video intercom at the entrance, residents can easily unlock the door from a smart device. They do not require physical keys. Also, they can grant permissions to the visitors on their own, ensuring security.
 - Keypads: The residents want easy access to the shared spaces also. With smart keypads, residents are authorized to access just with a PIN.

Smart Locks

Smart Locks are everybody's need for a keyless entry experience. You can upgrade the experience of residents by eliminating the option of physical keys (available for those who need them).

Every resident might have an experience of forgetting or losing the keys, leaving them locked out. By installing smart locks, you can authorize them to lock and unlock the doors

smartly through a mobile app. These smart locks can be installed for community amenities also.

Some reasons why residents prefer smart locks:

- They don't need to carry the physical keys.
- They will never get locked out.
- Nowadays, many smart locks come with digital keys. The residents can share the digital access codes with their visitors

Smart Thermostats

- A smart thermostat is a good example of a creative solution. With this, you can control the temperature of your apartment even when you are not home.
- Residents prefer to have smart thermostats because:
 - It reduces energy consumption and saves money.
 - It authorizes residents to maintain a temperature for pets, kids, or elders when they are not at home.
 - It lets the residents turn on the AC or heating before they reach home.
 - It can be controlled from any smart device.

SURVEY RESPONDENT MENTIONS

Several survey responses mentioned they are currently working with new technology provider firms. Below are several recommended by respondents.

Real Page

Real Page online rent payment solutions offer a wide range of options that makes paying rent, application fees, and deposits fast, simple and secure. Eliminate in-office handling.
<https://www.realpage.com/online-payments/>

Actionfigure

Actionfigure incorporates all mobility options – public transit, bikeshare, carshare, and ride hailing services – presented in real time so people can make informed, sustainable decisions on how to get around. Actionfigure provide real time location-based displays and its “Mobility Score” provides a third-party validation online for your property.
